I finish all my function and below is my result:

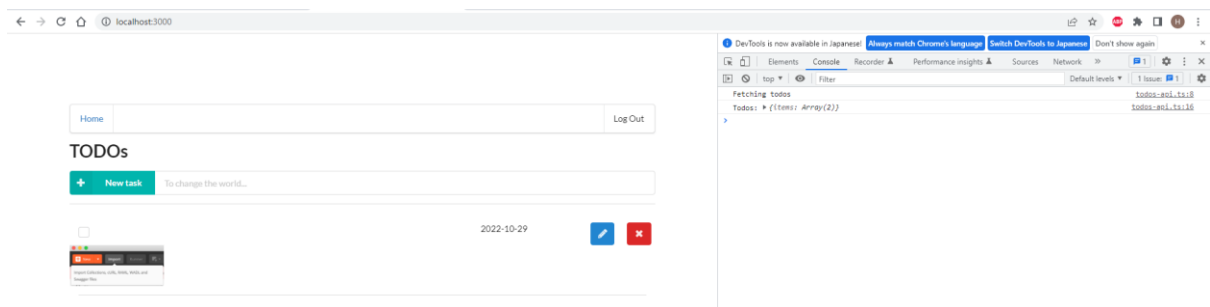

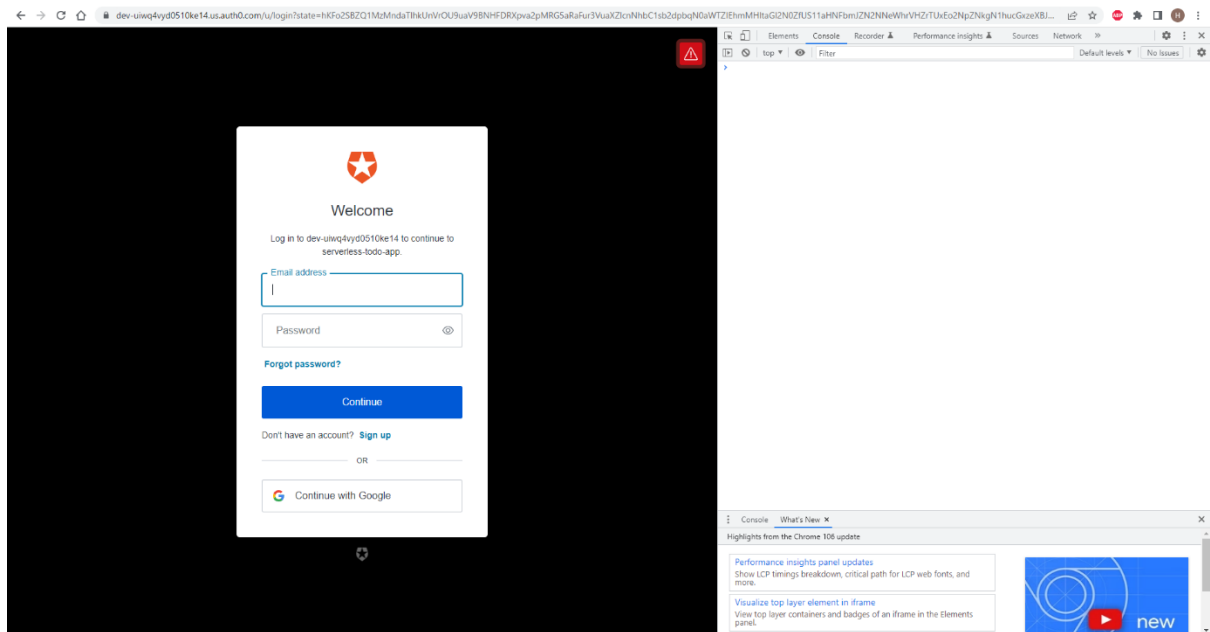

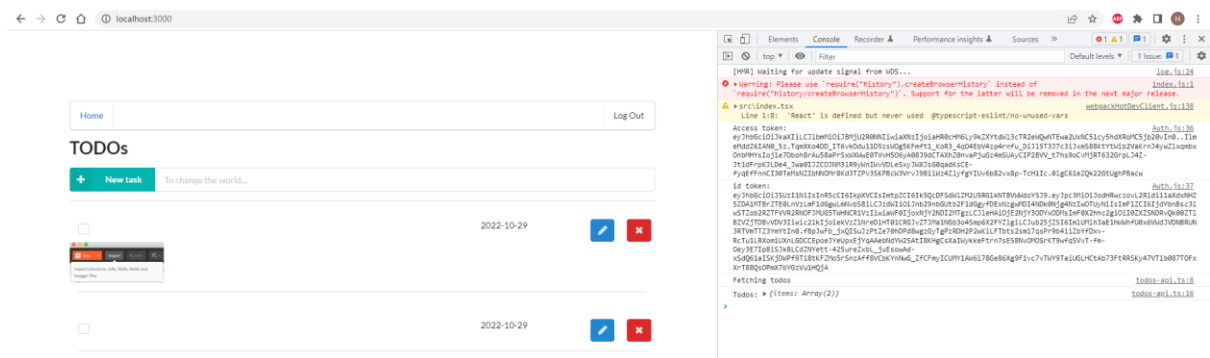

Edit image:

Delete todos:
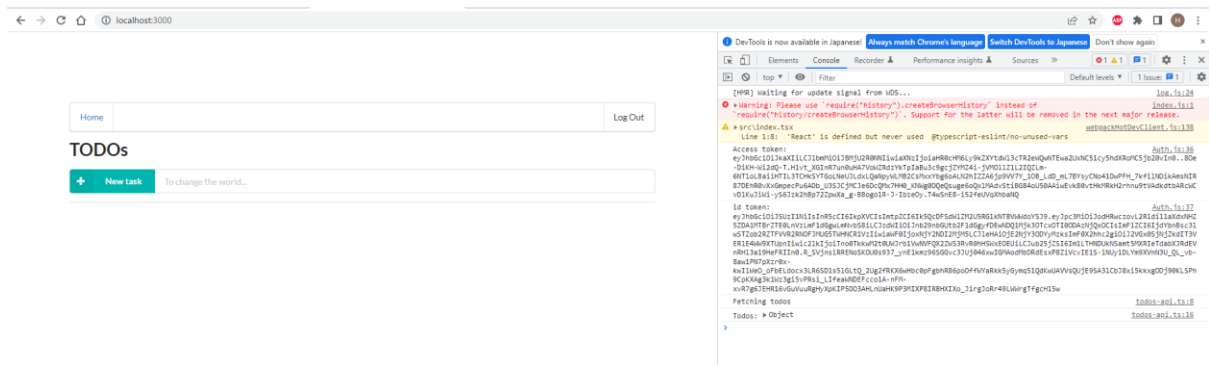

Auth0:

Reload todos per login user:

Orther user can't see other user todos list:

Other task I think you need to see on my code otherwise I can't think out how to catch those evidence!

Here is my git:

https://github.com/T16CS036/c4-final-project-starter-code.git

I have already update latest information for config.ts & auth0Authorizer.ts

Please check it for me! Thank you so much for your support!
